

Vertical Carton Feeder

- ☛ *Use in conjunction with ink jet coders and automatic labeling systems*
- ☛ *Handles up to 2400 cartons an hour*
- ☛ *Feeder also available separately*

The Hadley Vertical Carton Feeder is ideal for knock-down carton coding and labeling operations. In a few seconds, cartons glide through the system quickly and accurately, coded or labeled to your specifications. Cartons up to 48" wide and 48" long can be accommodated. Cartons are first loaded into the infeed magazine. A suction drive picks each carton and loads it into the conveyor drive holding it firmly in place for precise printing or label application on any of the carton's four sides. After coding or labeling, the carton is dispensed into the discharge magazine, ready for packing or subsequent handling procedures.

Shown here with printer-applicator

Industrial-grade aluminum framework makes the unit sturdy enough to withstand continuous use at speeds up to 2400 cartons an hour, depending on carton size. And with built-in casters, the carton handling systems adapts to most working conditions. The carton feeder may be purchased separately. Ink jet coders can be attached to work in conjunction with the system as well as printer-applicators or preprinted label applicators.

Standard Features

- ☛ Aluminum framework
- ☛ Mounted casters
- ☛ Adjustable conveyors

Vertical Carton Feeder

System Specifications

OPTIONS

- ☞ Feeder available separately
- ☞ “Smart” applicator stands
- ☞ Extended length
- ☞ Accumulating discharge conveyor

Dimensions

170”L x 65”W x 88”H

Maximum Carton Size

48”W x 48”L

Thickness Range

Fully adjustable to accommodate various thicknesses of most single wall and double wall cartons

Printing/Labeling Productivity

Up to 2400/hour (product dependent)

Power Input

120VAC (240VAC optional)

Air Requirements

80 psi - 15 SCFM

Construction

Industrial-grade aluminum, mounted on casters for easy movement
